

MITESH SHRIKANT SHAH

Academic Professional | Electronics & Communication Engineering

9427758899 | mitec2012@gmail.com | Anand, Gujarat

PROFESSIONAL SUMMARY

Dedicated Electronics & Communication Engineering academician with 20+ years of teaching experience, including long-term service as a lecturer at B & B Institute of Technology. Strong expertise in Digital Electronics, VLSI, IoT, Microcontrollers, Embedded Systems and Python. Experienced in laboratory development, student mentoring, project guidance and practical, application-oriented learning.

PROFESSIONAL EXPERIENCE

Position & Institution	Period
Industry Professional Dogma Industries	10 Aug 2026 – Present
Permanent Lecturer B & B Institute of Technology	09 Jul 2007 – 04 Aug 2026
Visiting Lecturer B & B Institute of Technology	01 Aug 2006 – 09 Jul 2007

CORE COMPETENCIES

- Programming: C, Embedded C, Python, HTML, PHP, Verilog
- Embedded Hardware: Arduino, ESP8266, Raspberry Pi
- Design & Tools: MATLAB, Kodular, Tinkercad
- Teaching: Theory, laboratory instruction, tutorials, examination and academic documentation
- Mentoring: Student project guidance, practical implementation and technical problem solving

EDUCATIONAL QUALIFICATIONS

Qualification	Institute / University	Year	Result
M.E. (SPAC)	ADIT, V. V. Nagar, GTU	2013	Distinction (7.62)
B.E. (EC)	ADIT, V. V. Nagar, S.P. University	2006	64.74% (First Class)
Diploma (EC)	B & B Institute of Technology, Vallabh Vidyanagar (TEB)	2003	80% (Distinction)

SUBJECTS TAUGHT

Digital Electronics, Electronic Devices & Circuits (EDC), VLSI, IoT, Python, Microcontrollers and other Electronics & Communication Engineering subjects.

ACADEMIC & TEACHING CONTRIBUTIONS

- Guided 500+ diploma student projects, supporting students from concept development through implementation.
- Completed 50+ Faculty Development Programs (FDPs).
- Prepared lecture notes, tutorials, examination papers and academic documentation to support effective teaching and assessment.
- Conducted theory classes, laboratory sessions and tutorials according to academic schedules and subject allocations.

SELECTED PROJECT GUIDANCE & TECHNICAL PROJECTS

- Automatic tea/coffee making machine and automatic soda-making machine
- Image-based object recognition with automated drawer opening
- Lift automation and automatic water-bottle vending machine
- Automatic railway crossing, water-level controller and soap dispenser
- Automatic petrol filling system for four-wheelers
- Leaf recognition, video watermarking and material-counting applications using MATLAB
- Solar-panel direction control using image processing and sun-direction analysis
- Mobile-app and Raspberry Pi controlled image display and device control
- Long-range Arduino communication for agricultural motor control
- Restaurant pager system and Alexa/app-controlled devices

ACADEMIC ACHIEVEMENTS

Master's Dissertation: Video Compression Algorithm Using Accordion Technique – MATLAB / Image Processing.

State-Level Achievement: First Prize at CREATO 2003 for an Electronic Ballast project developed to replace the conventional starter and choke used in fluorescent tube lights.

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge.
