AI/ML Engineer | Ahmedabad, Gujarat, India

PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Artificial Intelligence, Machine Learning, and Data Science, with strong hands-on experience in Python, PyTorch, TensorFlow, NLP, data visualization, and deep learning. Skilled in building and evaluating machine learning models, developing AI-driven applications, and working with real-world datasets. Completed an AI internship at Indus University and reached the Final Round of the Odoo x Indus University Hackathon 2026. Currently expanding expertise in Generative AI, AI Agents, and advanced AI application development.

EDUCATION

Bachelor of Technology in Computer Science Engineering <i>Indus Institute of Technology & Engineering, Indus University</i>	Expected May 2027 <i>Ahmedabad, Gujarat</i>
Higher Secondary Certificate (HSC) <i>Diwan Ballubhai School</i>	2023 <i>Ahmedabad, Gujarat</i>

TECHNICAL SKILLS

Languages: Python
AI/ML Frameworks: PyTorch, TensorFlow, Scikit-learn
Deep Learning & NLP: Neural Networks, Deep Learning Models, NLP, Hyperparameter Tuning
Data Science & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Data Visualization, Feature Engineering
ML Concepts: Machine Learning Algorithms, Data Preprocessing, Model Evaluation, Model Deployment (Learning)
Tools: Jupyter Notebook, Google Colab

WORK EXPERIENCE

AI Intern — Indus University • Completed a one-month AI internship covering machine learning, deep learning fundamentals, and neural network concepts.	Jun 2024 – Jul 2024
AI Intern — Ativeg Technologies • Currently working on NLP and AI/ML projects, with upcoming learning focused on Generative AI and Agentic AI.	Jul 2026 – Present

PROJECTS

Student Performance Analytics Dashboard <i>Python, Pandas, Matplotlib, Seaborn, NumPy</i> • Built an analytics dashboard to analyze and visualize student score data across 5+ performance metrics for a dataset of 500+ student records. • Applied data preprocessing, feature engineering, and exploratory data analysis (EDA) techniques, reducing data inconsistencies by ~30%.	GitHub
LifeOS – AI-Powered Healthcare Platform <i>ML, Generative AI, NLP — Currently in Development</i> • Developing an AI-powered healthcare platform for symptom analysis, medical record understanding, personalized fitness and nutrition recommendations, medication management, and health tracking. • Integrating Generative AI, NLP, and intelligent recommendation systems to analyze user health data and provide personalized insights, summaries, and recommendations across multiple healthcare and wellness modules.	GitHub

HONORS & ACHIEVEMENTS

Odoo x Indus University Hackathon 2026 – Reached the **Final Round** (Apr 4–05, 2026), organized by CSE Department, IITE, Indus University.
AI Internship Certificate of Appreciation – Indus University (Jun–Jul 2024).

CURRENTLY LEARNING

Core Areas: Generative AI, Agentic AI | **Technologies:** LangChain, RAG Pipelines, LangGraph
